Stainless steel thermos milk container	1 l
Voltage	230 V AC
Output	1350 W
Weight	13.8 kg
Dimensions (B x H x D)	31 x 37 x 43.5 cm
Cable length	approx. 1.1 m
Tests	CE Ⓢ
EU article number	13264
Swiss made	■

IMPRESSA
if you love coffee

IMPRESSA Z5 chrome – a polished performance

Ristretto, Espresso, Regular coffee, Café au lait, coffee served in the glass, Cappuccino, and Latte Macchiato: if you like genuine coffee specialities, you'll love the new IMPRESSA Z5 chrome. With this model, JURA offers a fully automatic espresso and coffee machine with professional features for home use. Its elegant design with the undulating 3 mm-thick, polished and chrome-plated aluminium front panel will satisfy even the most demanding aesthetic tastes. The combination of the Rotary Switch and clear text/graphic display makes the machine easy to operate, and turns navigation through the various programming stages into pure pleasure.

Craftsmanship at its most perfect

Weighing in at 725 g, the cup platform is made of solid, die-cast zinc, chrome-plated and hand-polished to create a highlight in a class of its own. In fact, it is difficult to imagine a more ideal setting for a perfect cup of coffee. It is manufactured in several complex steps with an immense amount of skill and attention to detail. Creating a work of art like this from a die-cast zinc blank calls for a wealth of experience, professional pride and delicacy of touch.

One Touch Cappuccino Frother

It's a pleasure for the senses: hot, foamy milk flowing into the cup; steam rising and giving us a foretaste of what is to come; the fabulous aroma of coffee sinking to the bottom of the cup, mixing with the milk and forcing the creamy topping up to the rim. The creation of a perfect cup of Cappuccino is one of the most sensual things imaginable. Prepare coffee specialities like Cappuccino or Latte Macchiato to perfection, all at the touch of a button, without even needing to move the cup. The revolutionary One Touch Cappuccino Frother makes it all possible. And the beautifully designed thermos container in its stainless steel cover keeps milk cool all day long.
